

[illegible]

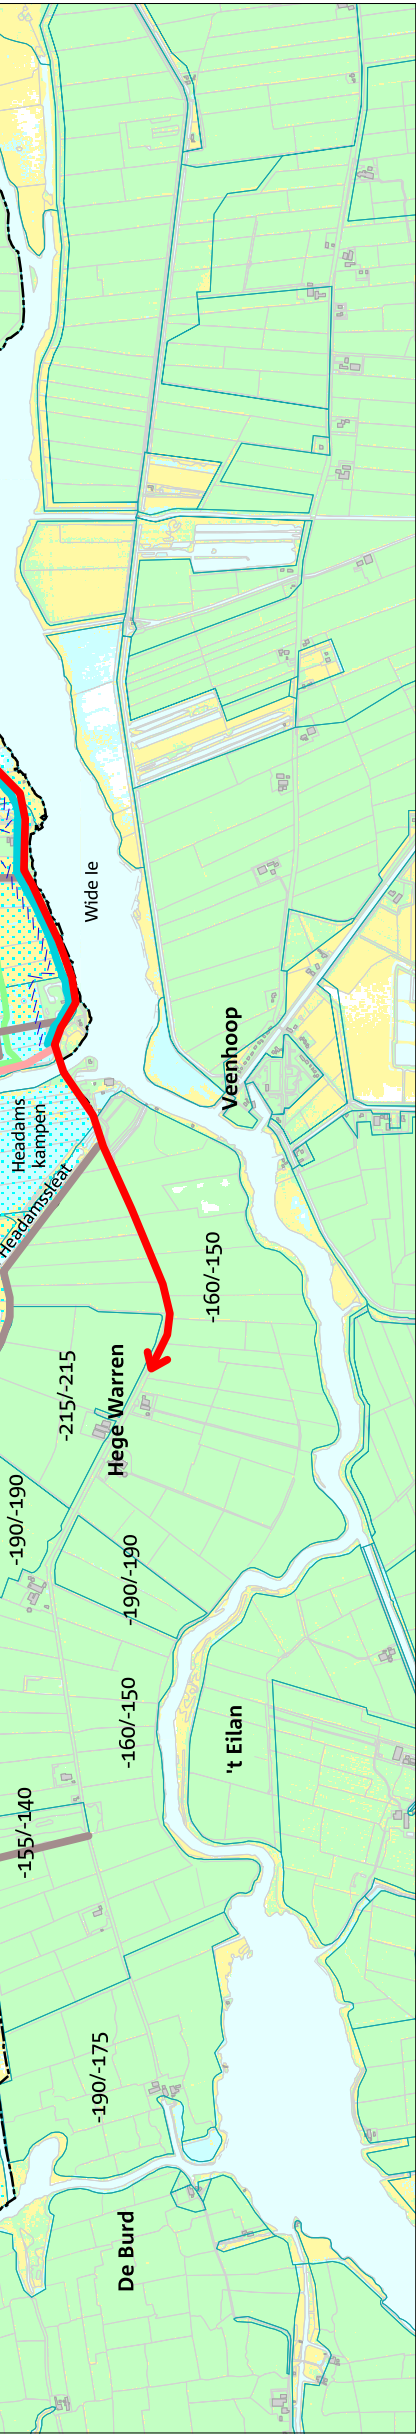

The map displays the Earnewâld area, a complex water management region in Friesland. Key features include:

- Water Management Areas:** Several areas are designated for specific management, such as 'Cyclisch beheer' (cyclic management) and 'Hege Warren' (high warren).
- Elevation Contours:** The map is overlaid with numerous contour lines indicating different elevation levels, such as -180/-150, -100/-130, -52/-80, and -150/-160.
- Infrastructure and Landmarks:** Various landmarks and infrastructure are labeled, including 'De Burd', 't Eilan', 'Veenhoop', 'Earnewâld', 'De Bolderen', 'Earnewâld', 'De Burd', 't Eilan', 'Veenhoop', 'Earnewâld', 'De Bolderen', 'Earnewâld', 'De Burd', 't Eilan', 'Veenhoop'.
- Water Bodies and Canals:** The map shows a network of canals and water bodies, including 'De Bolderen', 'Earnewâld', 'De Burd', 't Eilan', 'Veenhoop', 'Earnewâld', 'De Bolderen', 'Earnewâld', 'De Burd', 't Eilan', 'Veenhoop'.
- Color Coding:** The map uses a color-coded system to distinguish between different types of land and water, with green representing land and blue representing water.

[illegible]

The map displays the Earnewâld area, characterized by its complex water management system. Key features include:

- Water Management Zones:** Various zones are delineated by different colors and patterns, such as the blue hatched area in the center and the green hatched area on the right.
- Dikes and Boundaries:** Solid black lines represent dikes, while dashed lines indicate other boundaries or paths.
- Infrastructure:** Roads like 'De Burd' and 'Veenhoop' are shown, along with a railway line and several bridges.
- Place Names:** Numerous locations are labeled, including 'Earnewâld', 'Hegerwarren', 'De Burd', 'Veenhoop', and 't Eilan'.
- Elevation Points:** Numerous numerical values (e.g., -130/-130, -100/-100, -52/-52) are scattered across the map, likely indicating specific elevation points or water levels.
- Red Line:** A prominent red line with arrows traces a path through the area, possibly representing a specific water management route or a boundary.

The map shows a coastal area with a large body of water on the left. A red arrow points from the water towards the 't Eilan area. The map includes labels for 't Eilan, Veenhoop, Hege Warren, De Burd, and various elevation points like -160/-150, -190/-175, and -190/-190. The map also shows a network of roads and a railway line.

This topographic map shows a landscape with a prominent river or canal winding through it. The area is divided into green fields and yellow patches, possibly indicating different land uses or vegetation. Buildings are scattered throughout, with a cluster near the label 'Veenhoop'. A red line, likely representing a boundary or a specific path, runs vertically through the left side of the map. The label '-160/-150' is placed near the river, and 't Eilan' is written in a larger font near the bottom left. The map uses a color-coded system to distinguish between different types of terrain and structures.

An aerial photograph showing a large, light-colored building complex, possibly a school or institutional facility, situated in a rural or semi-rural area. The complex is surrounded by green fields and roads. The image is oriented vertically, with the top of the page showing the building complex and the bottom showing the surrounding landscape.
